Dear Chairman Nesbit and members of the House Energy Committee,

The Legacy Energy Group, LLC with offices in Frankenmuth, Michigan manages energy procurement for Commercial and Industrial customers throughout North American. I am here today representing two of my Michigan industrial customers that have been on Electric Choice since 2008.

Each of the industrials saves over \$150,000 in annual savings from being on electric choice. These savings allow them to provide competitive products and maintain and/or expand their operations in Michigan.

House Bill 4298 would negatively impact the cost per product metric that is closely monitored to determine where production should be shifted. On behalf of my industrial customers, I urge the Committee Members to Vote no on House Bill 4298.

Sincerely,

Thomas M. Ihrig
